INSTALL MDC2 BLUOS-D

STEP A

Remove the MDC Classic cover and top cover by loosening and taking out the screws holding them in place.

STEP B

This PCB assembly includes static sensitive components, take appropriate precautions.

1. Take note of the unique Wi-Fi MAC address (the same can be found on the MDC2 BluOS-D metal back plate). This is needed when configuring the MDC2 BluOS-D.
2. Remove the protective tape from the contact terminals.
3. Slide MDC2 BluOS-D module through the rail pushing all the way to the corresponding connectors.
4. Make sure MDC2 BluOS-D module is locked in.
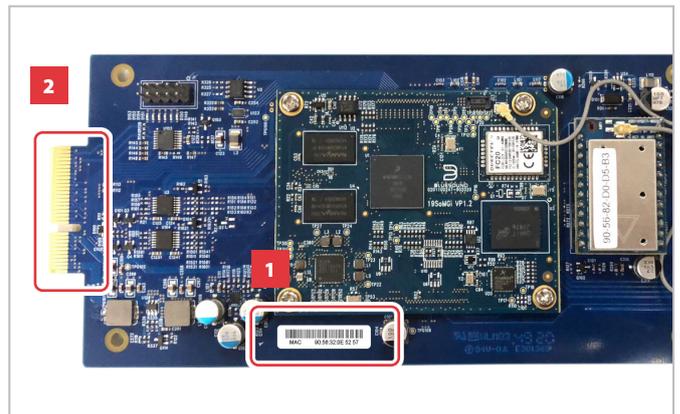

Use corresponding screws to fix back into place MDC2 BluOS-D module and top cover.
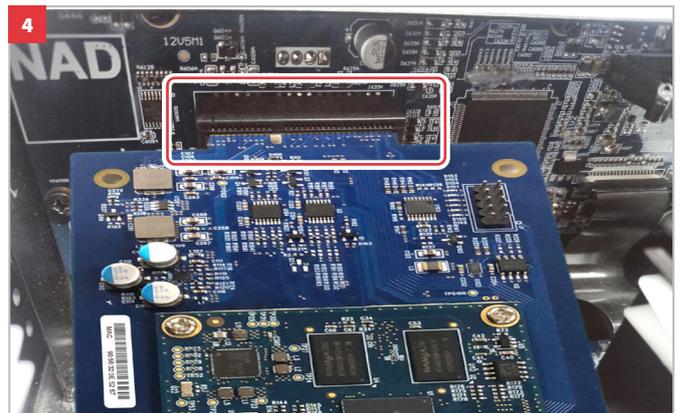

CONNECT!

WIRED CONNECTION*

Connect Ethernet cable (not supplied)

*Requires broadband router that supports Ethernet and/or WiFi standards

BLUETOOTH AND WI-FI ANTENNA CONNECTIONS

Connect supplied Bluetooth antenna and Wi-Fi antenna*

DIRAC SETUP CONNECTION

Assemble together supplied MIC assembly and USB MIC Sound Adaptor and then connect to USB port of MDC2 BluOS-D.
