

SPIRIT PROFESSIONAL

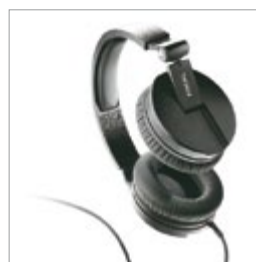

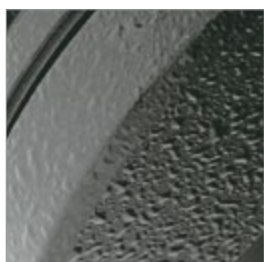

Product Specification Sheet

The Spirit Professional headphone is a direct result of the renowned expertise of Focal: the design of high performance transducers. In keeping with the monitor loudspeakers of this French manufacturer, the Spirit Professional headphone ensures precise control of quality without compromise. The utmost attention paid to the design of the Mylar/Titanium alloy drivers results in sound reproduction that respects the original dynamics of the audio signal, while providing a remarkable degree of definition and neutrality. Finally, the highly accurate reproduction of bass frequencies will reveal the smallest defects in the mix, while avoiding acoustic constraints of the workspace.

Key points

- Acoustic transparency and ease of use
- Precise and detailed sound reproduction, without distortion
- Excellent isolation and acoustic coupling to the ear
- Total control of the audio band
- Optimal comfort

Type	Closed back, circumaural headphones
Impedance	32 Ohms
Sensitivity	102dB SPL / 1mW @ 1kHz
THD	<0,3% / 1 kHz / 100 dB SPL
Frequency response	5Hz - 22kHz
Driver	matching 40mm (1 ^{9/16} ") ; Mylar/Titanium
Net weight	0.9lb (255g)
